SCOPE OF WORK

ASPHALT ROAD REPAIRS FORT SAM HOUSTON NATIONAL CEMETERY, SAN ANTONIO, TX

- A. <u>The Contractor:</u> Shall provide all labor, supervision, tools, transportation, equipment, and materials necessary to repair a section of asphalt roadway at Fort Sam Houston National Cemetery, as described herein.
- B. The Work: The Work shall include, but shall not be limited to the following (not necessarily in the order indicated):
 - Survey, evaluate, determine, and verify the existing conditions within the designated project work area.
 Verify the locations of all existing underground utilities. Contractor's licensed professional land surveyor or civil engineer shall survey, layout, and stake the path of the new drainage system with final approval by the COR.
 - 2. IMPORTANT NOTE: The road repair work is located on the main access road into the cemetery grounds. Work closely with the COR and other cemetery staff to coordinate traffic detours and traffic control. The COR shall provide final approval of the traffic control plan prior to starting work. Prepare the site, traffic signage, and secure the area from public access for the duration of the work.
 - 3. Saw cut and remove the existing asphalt paving in the area as designated in the contract drawings.
 - 4. Re-compact the existing base material to 95% compaction. Proof roll and perform compaction testing to identify unsatisfactory areas of base material that does not reach the 95% compaction requirement. Rework (scarify, dry, re-compact) and/or replace existing base material as necessary to achieve the required compaction.
 - 5. Grade and prepare the base material for the application of the new asphalt pavement.
 - 6. Install new 3" asphalt pavement in accordance with the contract drawings and specifications.
 - 7. COR shall verify the new asphalt drains properly and contains no bird baths or unacceptable workmanship prior to final acceptance.
 - 8. All excavated material, debris, and waste shall be removed from cemetery property and disposed of in an approved landfill.
 - 9. Thoroughly clean up the work area at the end of each day's work, and at completion of the project. Leave premises clean and free of waste, scrap, used equipment, or other material intentionally or incidentally delivered to the site by Contractor or Contractor's personnel.
- C. Time of Completion: The project shall be completed within 30 calendar days after contract award.
- D. Code Compliance: All work shall be performed in accordance with National, State, and Local Codes.
- E. <u>Contractor Quality Control</u>: 1) The Job Site Superintendent will: a) review and approve submittals, b) inspect the quality of work performed, and c) certify the completed work for payment and other purposes.
- F. <u>Submittals After Award</u>: Provide submittals for prime coat, tack coat, asphalt paving mix, and new base material used to repair the existing base material.
- G. Plans/details: Drawing X-1: Cover Sheet & Index; Drawing L-1: Site Plan, Section, & General Notes.
